2.
Late C19. 2-storey. 7-bay building of red brick with yellow brick bands. On 1st floor tall, pointed-arched windows under gables alternate with lower windows, all of 5 lights. Ground floor windows modern. At right projecting external stairway covers 3 ground floor bays. Chamfered reveals and 4-centred relieving arches to windows. A rather Art-and-Craft effect overall. Group value.

The Church of St Mary of Eton, the Tower. The Mission Hall and Eton House form a group.
