2.  
Non-denominational chapel. 3rd quarter of C19 in picturesque Gothic style. Plain fortress-like south wing has angle towers and a blank 1st floor over entrance archway. North of this a porch bay leads to the chapel proper, an octagonal tower with spire having 1-bay arms on other 3 sides and a tiny apse to the north. Grey brick with stone dressings. Lower windows mullioned and transomed, tower windows with Perpendicular-type tracery. Many tall gabled buttresses. Interior has pointed vaulting. Included partly for landscape value.
