Evangelical Church

II

Iron mission church. Built 1858. Originally clad in corrugated iron; now re-clad in corrugated asbestos sheeting. Single storey shed with pitched roof and central 'steeple' at the front. Pointed arch doorway, flanked by paired lights. Five bays of paired lights on each side wall of the church, with pointed wooden frames. Glass c.1900.

Interior: Panelled entrance lobby with chamfered muntins, panelled dado. Iron roof trusses with decorated Gothic spandrels, wooden rafters. Wooden pews. Reading platform at east end with twisted balusters and curved pulpit; large organ behind.

An early, rare and complete example of a temporary iron Mission Church .
